Joni:

I left you a phone message on this. I have learned that we have delivered three additional monitors to Portland today that are ready for pick up by your staff. We have also identified several possible candidates for a personnel loan. Jan Hastings will be following up with Nina DeConcini on this.

Dennis McLerran
Regional Administrator
EPA Region 10

Subject: Help please

Dennis:

As we discussed, we are in desperately in need of more air quality monitors we can deploy in communities based on the greatest need for more data. We have borrowed one unit from LRAPA and are asking LRAPA and SW Clean Air for more equipment if they can spare it. Any additional assistance from EPA is welcome!

I appreciate your time by phone over the past few weeks and your support of DEQ's efforts.

Thanks and I will be in touch.

Joni
